

Ideation Phase

Brainstorm & Idea Prioritization

Date: 13-07-2026

Team ID: SWTID-2026-5429

Project Name: UCab – MERN Stack Cab Booking System

Step-1: Team Gathering, Collaboration & Select the Problem Statement

Objective

The project team conducted a brainstorming session to identify the major transportation challenges faced by users and discuss possible technology-based solutions. Based on user research and empathy mapping, the following problem statement was selected.

Selected Problem Statement

"Users face difficulties in booking cabs quickly due to lengthy booking procedures, lack of transparent fare estimation, limited ride management features, and the absence of a simple, secure, and user-friendly online cab booking platform."

Team Discussion Points

- Difficulty in finding nearby cabs.
- Time-consuming booking process.
- Lack of secure authentication.
- No centralized booking history.
- Poor user experience in traditional booking methods.
- Need for a responsive web application.

Brainstorm & Idea Prioritization

UCab, an online cab booking system, MERN stack project.

Project Details

Project Name : UCab, an online cab booking system, MERN stack project.

Team ID : SWTID-2026-5429

Date : 13-07-2026

- A Team gathering**

Define who should participate in the session and send an invite. Share relevant information or pre-work materials.

 - Team: 5 Members
 - Roles: Frontend Developer (React), Backend Developer (Node.js), Database Developer (MongoDB), UI/UX Designer, Tester
 - Tools: VS Code, Postman, MongoDB Compass, Figma, Miro
- B Set the goal**

Think about the problem you'll be focusing on solving in the brainstorming session.

 - Goal: Identify key features and innovative solutions for UCab to provide a simple, secure and user-friendly cab booking experience.
- C Learn how to use the facilitation tools**

Use the Facilitation Superpowers to run a happy and productive session.

UCab – Online Cab Booking System

Example Screen

UCab Home Book Ride My Rides Profile

Hello, Aishwarya!
Where would you like to go today?

Pickup Location
Madhapur, Hyderabad

Drop Location
Gachibowli, Hyderabad

Select Ride Type

Mini 4 Seats ₹120 - ₹150	Sedan 4 Seats ₹180 - ₹230	SUV 6 Seats ₹250 - ₹330
--------------------------------	---------------------------------	-------------------------------

[Get Fare Estimate](#)

Estimated Fare
₹210

Estimated Time 25 mins

Why choose UCab?

Affordable Fares	Secure Bookings	Quick Support	Safe Rides
------------------	-----------------	---------------	------------

Recent Rides [View All](#)

Madhapur, Hyderabad Gachibowli, Hyderabad 12 Jul 2026, 06:30 PM	₹210	Completed
---	------	-----------

Step-2: Brainstorm, Idea Listing & Grouping

During brainstorming, the team generated multiple ideas to solve the identified problem.

Brainstorm, Idea Listing & Grouping

UCab, an online cab booking system, MERN stack project.

Team ID : SWTID-2026-5429

Date : 13-07-2026

2 Step-2: Brainstorm, Idea Listing and Grouping

We brainstormed a wide range of ideas to solve the selected problem. All ideas were listed and grouped into relevant categories for better clarity and prioritization.

Idea Listing	
ID	Idea / Feature
I-1	User Registration and Login
I-2	JWT based Authentication
I-3	Book a Cab (Pickup & Drop)
I-4	Fare Estimation
I-5	Booking History
I-6	User Profile Management
I-7	Responsive UI / UX
I-8	Google Maps Integration
I-9	Live GPS Tracking
I-10	Online Payment Gateway
I-11	Driver Dashboard
I-12	Admin Dashboard
I-13	Ride Rating & Feedback
I-14	Push Notifications
I-15	Emergency SOS

Summary

A total of 15 ideas were generated during the brainstorming session. These ideas were grouped into relevant categories to ensure a structured approach to solving the problem and to help in the prioritization process.

Idea Grouping

Core Features

- User Registration and Login
- Book a Cab (Pickup & Drop)
- Fare Estimation
- Booking History
- User Profile Management

Security Features

- JWT based Authentication
- Secure Password Handling
- Data Validation

User Experience

- Responsive UI / UX
- Easy Navigation
- Fast & Simple Booking Flow

Location & Tracking

- Google Maps Integration
- Live GPS Tracking

Business & Monetization

- Online Payment Gateway
- Fare Management

Management Dashboards

- Driver Dashboard
- Admin Dashboard

Additional / Future Enhancements

- Ride Rating & Feedback
- Push Notifications
- Emergency SOS
- Cancel & Refund Handling

Step-3: Idea Prioritization

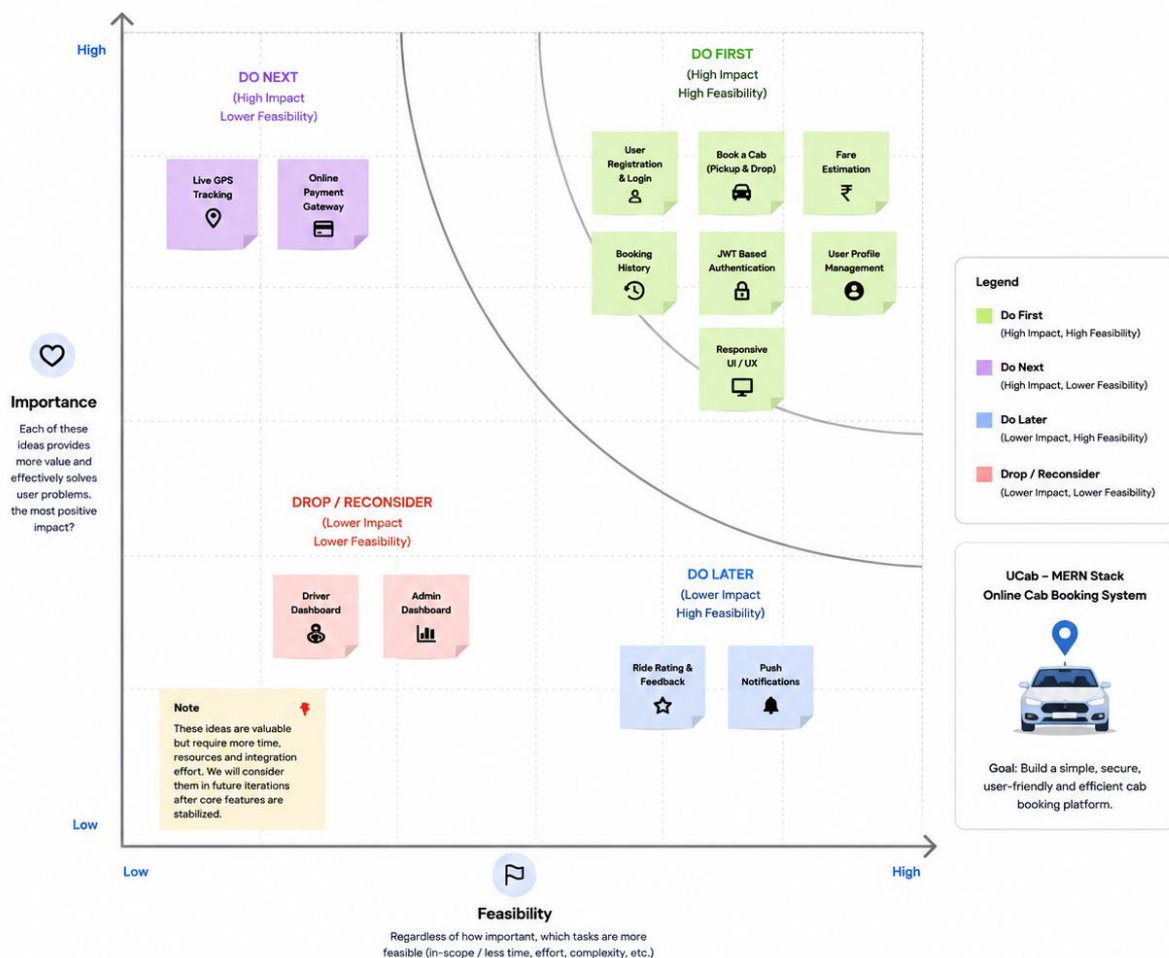

The ideas were evaluated based on **Business Value**, **Technical Feasibility**, **Development Time**, and **User Impact**.

3

Prioritize

Our team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes

Final Selected Features for UCab Version 1.0

The following features were selected for implementation in the first version of UCab:

- User Registration
- User Login
- JWT Authentication
- Cab Booking

- Fare Estimation
- Booking History
- Profile Management
- Responsive React User Interface
- MongoDB Database Integration
- RESTful API Communication

Future Enhancements

The following ideas were prioritized for future versions:

- Google Maps API Integration
- Live GPS Tracking
- Online Payment Gateway
- Driver Dashboard
- Admin Dashboard
- Ride Rating & Reviews
- Push Notifications
- AI-Based Fare Prediction
- Emergency SOS Feature

Brainstorming Summary

The brainstorming session enabled the team to generate multiple innovative ideas for improving the cab booking experience. Each idea was evaluated based on its feasibility, user value, and implementation effort. High-priority features such as secure authentication, cab booking, fare estimation, and booking history were selected for the initial version of UCab, while advanced functionalities including live GPS tracking, payment integration, and driver management were identified as future enhancements. This structured prioritization ensured that the project focused on delivering a practical, user-centric, and scalable solution.
