Project Name: UCab – MERN Stack Cab Booking System

Customer Problem Statement

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A daily commuter	Book a cab quickly to reach my office or college on time	I cannot always find a reliable cab immediately	The booking process is slow, and ride availability is uncertain	Frustrated and worried about being late
PS-2	A traveler visiting a new city	Book a safe and affordable cab with a clear fare estimate	I don't know which cab service to trust or how much the ride will cost	Existing options lack transparent pricing and a simple booking process	Confused and anxious about my journey

Problem Statement Summary

The customer problem statements identify the major challenges faced by users while booking transportation services. Customers need a reliable, secure, and easy-to-use cab booking platform that offers quick ride booking, transparent fare estimation, and a seamless user experience. The UCab application addresses these problems by providing a responsive MERN Stack web application with secure authentication, efficient booking management, and user-friendly navigation, ensuring improved customer satisfaction and convenience.
