Project Name: UCab – MERN Stack Cab Booking System

Empathy Map – UCab User (Cab Booking Customer)

Summary:

The empathy map identifies the expectations, behaviors, and challenges faced by users while booking cabs. It shows that users need a secure, reliable, and easy-to-use platform that offers quick booking, transparent fare estimation, and a smooth user experience. These insights guided the development of UCab, ensuring the application focuses on simplicity, convenience, security, and customer satisfaction.
